ABOUT US

Lunxin is a high-tech company specializing in intelligent interactive all-in-one terminals and application solutions. Driven by the vision of "Digital World, Digital China, Digital City," we are committed to innovation and quality in self-service terminals, accelerating digital transformation across industries.

Our strength lies in:

Expert R&D teams – advancing interactive technologies

Experienced solution teams – delivering customized designs

Strict production standards – ensuring premium quality

Certified with CCC, CE, FCC, RoHS, and more, our products serve government, healthcare, finance, and industrial sectors, with proven success in hundreds of large-scale projects. Trusted by partners for reliable products and professional service.

CORPORATE CULTURE

- Innovation & Quality – Strive for excellence.
- Customer First – Honor every commitment.
- Growth through Tech – Driven by progress and integrity.

PRODUCT APPLICATION

03 PRODUCT APPLICATION

GOVERNMENT AFFAIRS FIELD

Intelligent self-service devices powered by modern IT offer citizens convenient, efficient, round-the-clock government services. Featuring identity recognition, info inquiry, and service processing, they reduce queues and boost administrative efficiency.

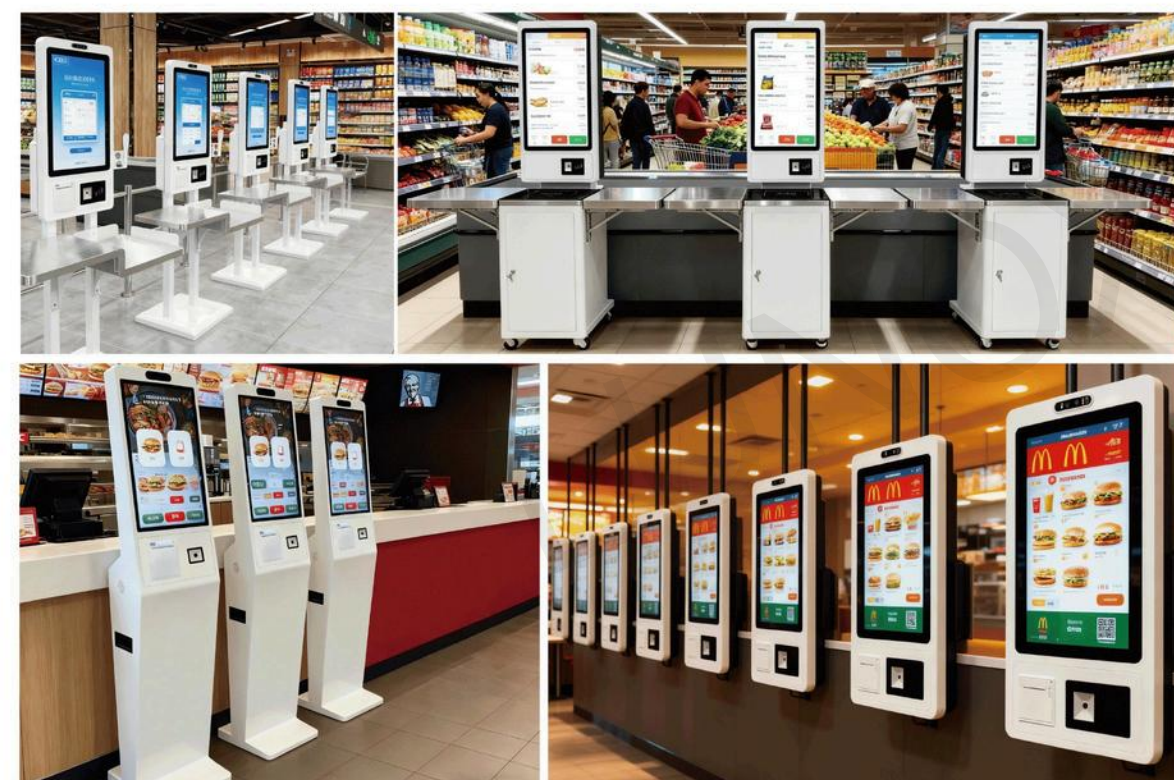

GOVERNMENT AFFAIRS FIELD

Intelligent self-service devices powered by modern IT offer citizens convenient, efficient, round-the-clock government services. Featuring identity recognition, info inquiry, and service processing, they reduce queues and boost administrative efficiency.

MEDICAL FIELD

With accelerating global population aging and rising healthcare demand, digital health solutions—from mobile apps and online pharmacies to internet hospitals—are reshaping the industry. Intelligent, information-driven healthcare is becoming the new norm, bringing smart medical services closer to people everywhere.

INDUSTRIES FIELD

The all-in-one POS terminal integrates checkout, ordering, inventory, and membership management. It simplifies payment processes and delivers data insights to support business decisions. Smarter and more intuitive than traditional systems, it greatly enhances F&B operational efficiency.
